

# SAVE THE PLANET AND SAVE A BUCK

Everytime you recycle, reuse, reduce, you not only help the environment but you save money too!

## THE FIVE R'S - "REPAIR"

- Repair your car to run more efficiently
- Repair your appliances
  - Seals on your refrigerator and clean coils
  - Clean out the outside dryer vent
- Repair your A/C, Heating systems and water heater
  - Add insulation to pipes
  - Replace your filter
  - Wrap a blanket around your water heater
  - Call a specialist to do a "Check-up"
- Repair window and door seals
- Repair leaky faucets and hoses

### ECO FACTS:

- *Each gallon of gas used by a car contributes about 19 pounds of CO<sub>2</sub> into the atmosphere. For a single car driving 1,000 miles a month, that adds up to 120 tons of CO<sub>2</sub> a year.*
- *A single polystyrene (Styrofoam) cup contains one billion billion molecules of CFCs--that's 1,000,000,000,000,000,000.*
- *Once a CFC atom reaches the ozone layer, it can take over 100 years before it breaks up and becomes harmless.*
- *About 110 million Americans live in areas with levels of air pollutants the federal government considers to be harmful.*
